DETAILED ACTION

1. Claims 1-58 are pending in this Office Action.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 23-59, 67-68 are drawn to discovering a list of fabric devices from a host system, classified in class 709, subclass 220.
 - II. Claims 16-22, 60-66 are drawn to providing I/O ports, classified in class 710/300.
3. Inventions I, II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, discovering a list of fabric devices from a host system in invention I can be used to create a node within the host system. Providing I/O ports in invention II can be used to discover device attached to the fabric. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2172

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
